

Batch Eligibility - My Task Workflow

Last Modified on 02/20/2024 11:27 am EST

The Eligibility section under My Tasks should be reviewed and worked daily when Batch Eligibility is turned on. This will ensure that all patients being seen have active coverage or have been contacted about inactive coverage.

Workflow

1. Navigate to my task list and click on **Eligibility**.

2. The Batch Eligibility Screen will open displaying all of your responses in 6 different categories. Selecting the category will display all of the patients that have fallen into that condition.

1. **Inactive** - The eligibility response reported back that the patient's coverage is inactive for the date of service requested. This will be represented by a **red** umbrella in the upper left corner of the appointment in iScheduler. 
2. **Active** - The eligibility response reported back that the patient's coverage is active for the date of service requested. This will be represented by a **green** umbrella in the upper left corner of the appointment in iScheduler. 
3. **Needs Review** - The eligibility response reported back that another payer was responsible for coverage or the system was not able to definitively determine the coverage for the payer from the response. This will be represented by a **orange** umbrella in the upper left corner of the appointment in iScheduler. 
4. **Payer Does Not Perform Eligibility** - The patient's insurance does not currently offer eligibility check. This will be represented by a **yellow** bell icon in the upper left corner of the appointment in iScheduler. 
5. **Pending** - The eligibility request was sent but a response has not been received.
6. **Error** - The eligibility check received no response or received an error response.

Eligibility	
✓ Inactive	4
Active	0
Needs Review	0
Payer Does Not Perform Eligibility	1
Pending	0
Error	3

Appointment Chart Patient Payer Message Location

- Review all **Needs Review** and fix all **Inactive** coverages. The list will sort by appointment, chart, patient, location, and primary insurance. Insurances can show up inactive for a variety of reasons.

Eligibility					
✓ Inactive					4
Active					0
Needs Review					0
Payer Does Not Perform Eligibility					1
Pending					0
Error					3

Appointment	Chart	Patient	Payer	Message	Location
02/20/2024	9757	Test, Adam	Anthem Blue Cross	Invalid/Missing Subscriber/Insured ID	Community South
02/21/2024	24814	Hula, Test	AARP/UHC	Patient Birth Date Does Not Match Tha...	fake clinic

- Click on the patient in the left window to open the Eligibility Task.

- ✎ Patient Setup
- 🗨 Patient Alert/Comment
- ✉ Send Communication
- 📄 Primary Insurance Card
- 📄 Secondary Insurance Card

- After you fix the errors, Click the Eligibility button to then run a real time eligibility from within the task list. When ran the partial insurance breakdown will show within the screen.

#	Carrier	Member ID	Policy/Group	Start	End	Last Run	Subscriber
1	TEST BCBS	151512		01/01/2001		✗ 09/10/2019	duplicate, test

Eligibility Toolbar Options

- **New button** - Will create a New Insurance Eligibility Request.
- **Hammer and wrench button** - Will run an Eligibility Request for the coverage that is selected on the screen.
- **PDF button** - Will display the patient's full eligibility report.
- **History button** - Will display the eligibility check history for the coverage that is selected.

After the insurance has been updated, click on the two refresh arrows for the task to fall off the list.

From the tool bar within the my task list you can export to excel, open patient in EMR, and open patient in the iScheduler.
