

# Overview of AlertMD Integration

Last Modified on 04/15/2024 10:15 am EDT

Our application now has the ability to integrate with AlertMD's Margie automated referral and recall management engine. Margie converts more referrals and recalls into appointments with automated outreach to increase patient volume. Easily integrate Margie's automated phone, chat and messaging system with your practice. Send images, videos, and interactive responses to your patients for improved patient engagement.

## This integration will:

1. Allow you to manage referral and recalls directly in the iScheduler
2. A nightly file will be sent to AlertMD to begin automatic calls/text/emails to the patients provided
3. Patients will be prompted to talk to the practice when they are ready to schedule the appointment

## The benefits of this integration include:

1. Provides a single, automated way to manage referrals and recalls

**Recall List**

Chart #  Last Name  Begin Date  Primary ID

Status  First Name  End Date  Value

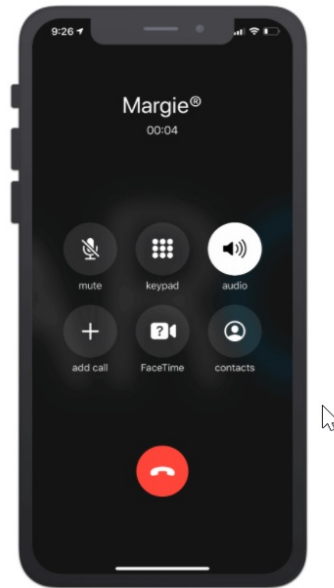

Resource  Max Rows

**Search Results** Row 0 of 25

	Sel	Appointment Date	Patient Chart	Last Name	First Name	Resource Name	Due Date	Status	Home Phone
