

EHI Export for Practice (All Patients)

Last Modified on 07/14/2026 11:33 am EDT

Performing an EHI Export for your Practice (All Patients)

First you will need to be in the [EHI Export screen](#), and then:

1. In the EHI Export Screen click on the New Export Request button
2. Choose All Patients
3. Click Request
4. Read the Confirmation message that explains the purpose of this All Patient export is to provide you with your patient data because you are planning to leave OfficeEMR and migrating to a new EHR platform. Clicking 'No' cancels the request and no further action is needed. Clicking 'Yes' will take you to an OfficeEMR Data Export Form to gather details for our Data Export Team to process your request for All Patient data.
5. Click the Start button to provide our Data Export Team with your practice details and other information to process your request to terminate your iSalus Healthcare Services and Export All Patient data.
6. The final screen in the Data Export Form requests a date you need the export by (please keep in mind the time to deliver data can vary based on practice size but generally we can deliver practice data within 15 days of an official request) and be sure to click on the **Submit** button because that is how our team is notified of your request. **The line item remains in a Queued status because there is no automation for Practice Export statuses. To get a status update you should reach out to the iSalus Team Member that contacted you regarding your Practice Export. If you have not heard from anyone then open a support case to request an update.**

Report: EHI Export C4915

EHI Export [New Export Request](#) [Audit](#) [Refresh](#)

EHI Export is where you can export patient data. You can export data for a single patient or all patients within the practice with corresponding permissions. Please note: **The file will export in 30 days.** [Learn More](#)

New Export Request

Export Type

☐ Single Patient
 ☒ All Patients

Are you sure you wish to leave OfficeEMR?

You have initiated a Practice EHI Export, which has been built for migrating to a different EHR platform.

This will trigger a support case to cancel your services and obtain all of your practice EHI data. A member of our data team will be in contact to discuss the details of getting your data to you.

This will not immediately impact your access to your data or terminate your contract.

Do you wish to continue?

Yes

No
