

How to use Quick Picks

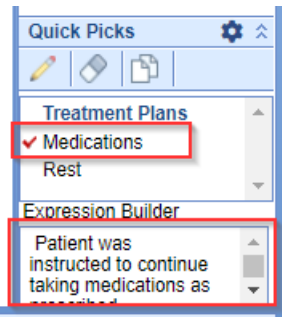

Last Modified on 08/30/2024 10:19 am EDT

Quick Picks can be used independently or can be grouped together to form phrases.

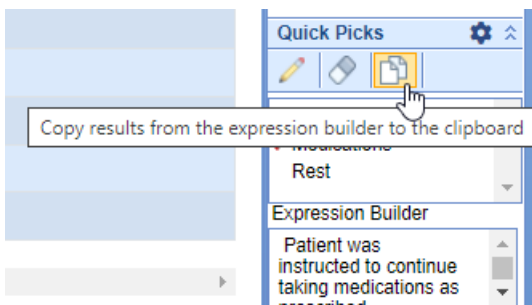

1. Begin by single selecting the desired phrase (to group phrases, select the desired phrases)

2. Selected phrases will display in the expression builder

3. User may choose to make edits to the expression builder before copying
4. Select the copy button to copy the text to your clipboard

5. Navigate to the desired area to paste and use 'Ctrl + V' to paste
