Quick Pay Window Overview

Last Modified on 03/12/2025 1:07 pm EDT

The Quick Pay window is typically utilized during the Check In/Out process. However, this window has several areas it can be accessed from and it's purpose is to allow the documentation or review of payment, claim entry, orders, prescriptions, letter, print queue, demographics, eligibility, intakes, photograph, insurance card image, and authorizations for the patient.

The Quick Pay window view may alternate between users as its settings are customizable. Click here to review the settings that alter the Quick Pay window view.
