

Company Setting: Patient Cost Estimator - Print Font

Last Modified on 09/23/2025 5:24 pm EDT

The "Patient Cost Estimator - Print Font" company setting allows a practice to toggle between the normal (default) font and a larger font within the printed cost estimates. This will allow the printed patient cost estimate font to be increased, making it more legible for the elder demographics.

A screenshot of a software window titled "Setup: Company Settings". The window has a light blue header bar with a lock icon and a search icon. Below the header, there are four tabs: a folder icon, a clock icon, a printer icon, and a gear icon. The main content area is white and contains the following fields:

- Setting:** A text box containing "Patient Cost Estimator - Print Font" with a search icon to its right.
- Value:** A text box containing the number "0".
- Rule:** A dropdown menu showing "Integer value between 0 and 1".
- Tool Tip:** A text box containing "0 = Normal Font Size, 1 = Larger Font Size".

The window has a blue border and a shadow effect.

Default Value: 0 (Normal Size Font)

Options:

- 0 - the normal font (12) will be used for printed estimates.
- 1- the larger font size (14) will be used for printed estimates.
