

MIPS Dashboard Quality Data Not Building Nightly

Last Modified on 01/16/2026 5:59 pm EST

Why is my MIPS Dashboard Quality Data not building as expected?

If Quality data is not building as expected in the MIPS Dashboard, follow the steps below in order.

Step 1: Confirm Reporting Year and Group

- Verify the **Reporting Year** is correct.
- Select **Group** (Clear out of the PI pop-up by clicking **OK**).

Step 2: Open MIPS Settings

- Click the **gear icon** located just above the **Reporting Year** drop-down.

Step 3: Verify Mingle Client ID

- Check the **Mingle Client ID** value (*If it is set to **CLIENTID**, it must be updated*).

Step 4: Update to Practice Database Name

- Change the value to the **practice database name** (for example C4699).
- To find the database name (Click the **Lock icon** at the top of the screen and choose About).

If the Mingle Client ID is already set to the database name, proceed to Step 5.

Step 5: Save Settings

- Click **Save**, even if no changes were made. This ensures the back-end settings are re-written to the **Mingle Reporting Year** table, which often resolves update issues.

Step 6: Trigger a Rebuild **Caution!**

- Click the **Hammer icon** to initiate the update.

For **large databases**, it is recommended to run this at the **end of the business day** to avoid performance impact for users.

Example:

MIPS Dashboard x

MIPS Dashboard

PROVIDERS Reporting Year 2025

Group 59358

Mason	07/05/2025	12/31/2025
Bunting	07/05/2025	12/31/2025

QUALITY Data Exports

Last Build 01/16/2026 4:47PM Administrator,...

For large databases, it is recommended to run this at the end of the business day to avoid performance impact for users.

Clinical Data Setup for 2025

Mingle Client ID CLIENTID

Interventions Reporting Year

Medications Reporting Year

Observations Reporting Year

☐ MIPS Data Locked For Reporting Year

Save Cancel

Clinical Data Setup for 2025

Mingle Client ID C53

Interventions Reporting Year

Medications Reporting Year

Observations Reporting Year

☐ MIPS Data Locked For Reporting Year

Save Cancel

Still Not Resolved?

If the issue persists after completing all steps above, open a **Salesforce case** and submit it to the **Compliance queue** for further review.
